This set of images were taken from the Rutland Bench, looking down Gibson towards McKenzie. The white arrow is showing you a darker section which is the corner of the lake and if you look at the fire line headed this way, you can see the line stretches from the edge of the water to the crest of the hill.

I have contacted my MLA, Minister of Forests, Kelowna Fire Department because smoke is causing visibility problems. We have offered our assistance because smoke is not an issue for the sight we can give them. I have told them we may be able to track the direction of the fire before it gets there.
